Hello fellow members,

As most of you know the JRSC Fall Series Regatta is one of our marquee events each summer. It is not possible without the significant volunteer efforts of our members. The JRSC Fall Series Regatta will be held this year on August 25<sup>th</sup> and 26<sup>th</sup>. The JRSC Fall Series is an official part of the 2023 AYC / I-LYA Racing Program. The racing results of the Fall Series will help determine the sailboat-of-the-year for our part of Lake Erie.

The JRSC Fall Series Regatta is a two day sailing event beginning with Registration and a Skipper's Meeting on Friday night. Racing will begin in earnest on Saturday. Again this year, we will have two racing venues. The bigger PHRF and JAM boats will race in NCYC waters, utilizing that club's existing marks. The smaller boats - Interlakes, Catalina 22s, and Wayfarers (new this year) will race from the JRSC Docks, rounding Turtle Island, and back.

On Saturday afternoon we will all reconvene at JRSC for an Awards Presentation and our traditional Spaghetti Dinner. Our clubhouse will be packed with sailors.

This ambitious event is not possible without the help of more than two dozen volunteers. They work behind the scenes to make the JRSC Fall Series a success. So I am reaching out to you to help with our 2023 Fall Series Regatta. Elsewhere in this edition of the "Skulldugger" is a list of volunteer positions that I will need filled. We will have a meeting for volunteers on Tuesday, August 8<sup>th</sup> at 6pm at the club. Even if you can't make that meeting, we can still use you as a volunteer. Please drop me an email if you can help out. Let me know which volunteer position you would like to fill.

The members of Jolly Roger always pull through. We have a tradition and reputation of hosting great events for the sailors of the Western Basin. Thanks in advance for your help!

Fair winds,

Ahoy my Jolly mates. This is my first column as your Vice Commodore and it will be very short. Thank you for your vote of confidence in my ability to lead the club into the year 2024. I would like to thank John Miga for the standup job he did as VC the first half of this year and offer my full support in the outreach program he has been working on with "Sailing Beyond Cancer". There will be a presentation soon on this initiative which sounds like a wonderful volunteer opportunity for our club. I'm looking forward to the rest of the 2023 sailing season and representing JRSC with pride and professionalism.

## Tracking Harmful Algal Blooms in Lake Erie with an Uncrewed Surface Vehicle

In August 2023, NOAA's Great Lakes Environmental Research Laboratory and its partners will deploy a *SeaTrac* Uncrewed Surface Vehicle (USV) platform in western Lake Erie. This deployment will correspond with NOAA's weekly harmful algal bloom (HAB) monitoring program.

### What should we expect to see?

While out on western Lake Erie and the Maumee Bay, you may see a yellow and black "vehicle" on the water, called a *SeaTrac*. The *SeaTrac* will move by itself along the surface of the water to and from predetermined points. At these points, it will pause and take measurements from different depths in the water, using sensors attached to the platform. **If you encounter the USV, please do not touch it.** Check out the information on the back of this sheet for more on how this vehicle works.

### Why is it out there?

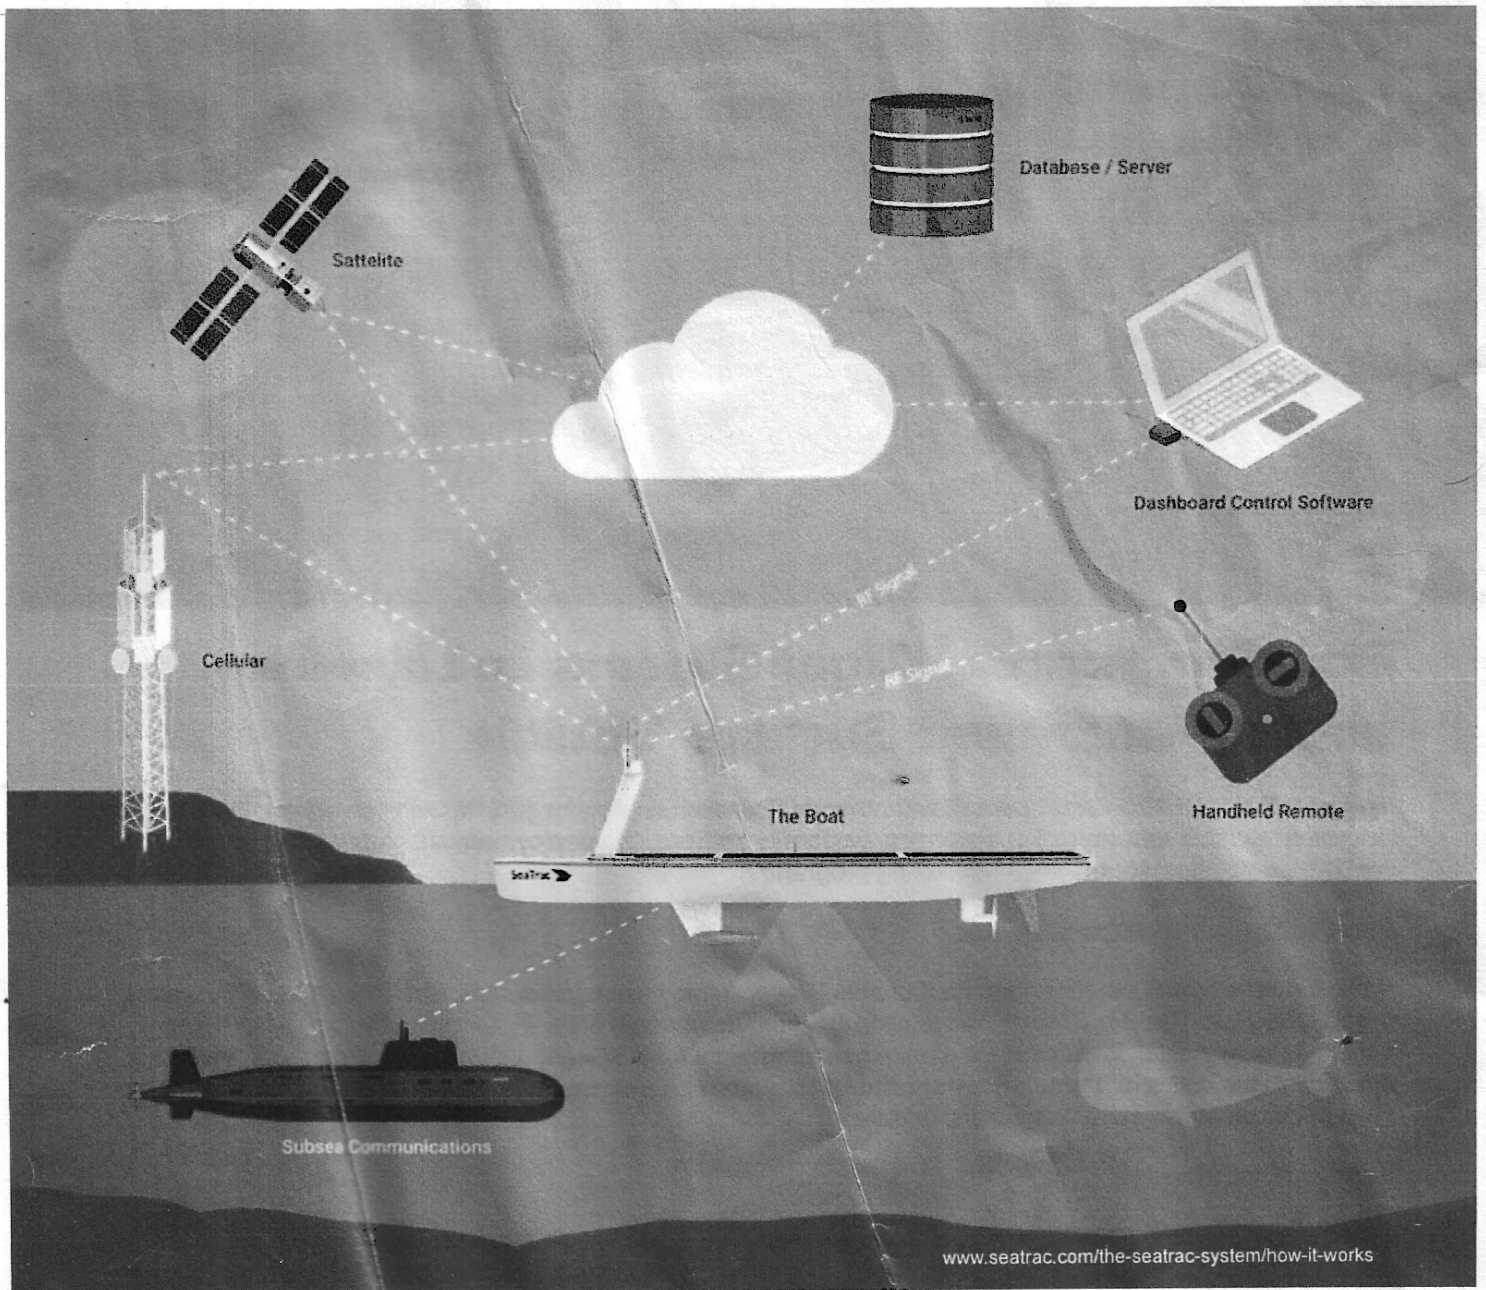

Nuisance blooms and toxic harmful algal blooms (HABs) are common in Lake Erie. Monitoring HABs in locations that are close to shore (such as swimming and fishing areas, drinking water intakes, etc.) is important. However, these areas also pose a challenge for a number of reasons, including shallow water depths, limited access to sampling locations, and difficult environmental conditions. The shallow draft of this USV will allow access to these locations in western Lake Erie for sampling as well as detailed mapping and toxin detection in Maumee Bay, where HAB toxin concentrations are typically high.

The development of a system that can access these shallow areas and transmit information to researchers and resource managers in near real-time will support timely decision-making for protecting public health and mitigating other HAB impacts. This advanced technology will also provide additional information that can be used in bloom and toxin forecasts. These efforts help advance NOAA's important decision support tools, such as the Lake Erie Harmful Algal Bloom Forecast.

For additional information, please contact:  
NOAA GLERL Information Services  
[Info-services.glerl@noaa.gov](mailto:Info-services.glerl@noaa.gov)  
or visit our website at [www.glerl.noaa.gov](http://www.glerl.noaa.gov)

## How it works

The boat is electric: it gets energy from the sun, and stores it in large batteries, enabling it to operate through varying weather conditions. The boat is autonomous: it runs programmed missions that can last from several hours up to several months. It normally makes decisions on its own, but it supports "person in-the-loop" and can be remotely controlled. Missions can be easily changed on the fly.

While out on the water, you may encounter the *SeaTrac*. The vehicle will stop if an object (boat, bird, person, etc.) is located near it. Once it senses that the object has moved, it will continue on its mission. If you do encounter the *SeaTrac* this summer, feel free to watch it as it moves around the lake collecting important information. **However, we request you do not attempt to interact with or touch the USV and please stay at least 25 feet from it when in the water.** This will ensure that our missions are not jeopardized and, most importantly, that you remain safe.

## ADULT SAILING COURSE - LEARN TO SAIL !

Experience sailing on the Ottawa River or Lake Erie with one of our veteran instructors. Experience the joy of boating without the roar of a motor. Learn how sailboats harness the wind and what it's like to glide silently across the water. Whether you want to know what it takes to own a sailboat, want to learn about cruising, want to dip your toe into the competitive world of sailboat racing, or just want to see how relaxing it can be to spend time on the water, let our group of instructors from the Jolly Roger Sailing Club introduce you to sailing.

### **The Jolly Roger Sailing Club course includes:**

— One hour orientation, going over safety procedures, what to wear, and matching you with the right instructor who fits your schedule. (We have boats available from 18 feet to 35 feet in length, and will match you with the right sailboat based on your comfort level and your goals for the class. Our larger boats sail out of Curtice, Ohio and La Salle, Michigan.)

— Ten+ hours of classroom instruction (spread out over six Mondays – 7:00 to 9:00 pm). You will receive a copy of the US Sailing text “Basic Keelboat” as part of your tuition.

— Six+ hours of on-the-water, hands on, instruction.

*(Your six hours of instruction can be taken in two 3-hour outings, or three 2-hour outings; weekdays, weeknights, or weekends. We are flexible and can match you with the instructor that fits your schedule.)*

— One hour graduation reception that reviews the lessons you've learned, explains how easy (and relatively inexpensive) it is to own a sailboat, and tells you what your next steps are along the road to becoming a sailor.

**Space is limited. Reservations and pre-payment are required.**

### **Two available sessions...**
